

chatINDECIMAL

Document-grounded AI assistant (RAG) – no hallucinations

 hello

 Information not found in documents.

 tell me about indecimal

 Indecimal provides **end-to-end home construction support** with a focus on **transparent pricing, quality assurance, and structured project tracking** from inquiry to handover. Their approach builds **confidence through commitment** (not just contracts) by emphasizing **clarity and trust** across every stage of the construction and ownership journey. Key features include:

- **Escrow-based payments** (funds held securely until stage completion is verified).
- **Stage-based contractor payments** (released only after verified milestones).
- **445+ quality checks** (strict audits for structural integrity, safety, and execution).
- **Real-time project tracking** (live photo updates via app/dashboard).
- **Fixed timelines with penalties** for delays.
- **Zero-cost maintenance program** (post-handover support for plumbing, electrical, masonry, etc.).
- **Dedicated team** (experts, relationship managers, project managers, and interiors/maintenance support).

Their **customer journey** spans 10 stages, from initial consultation to move-in and long-term maintenance, ensuring a **smooth, transparent, and accountable** experience.

Do you provide real-time progress visibility?

☺ Yes, Indecimal provides real-time progress visibility through their app/dashboard.

How does Indecimal reduce hidden surprises in pricing?

☺ The flow emphasizes receiving plans that include **detailed design and cost plans with transparent pricing and “no hidden surprises.”**

What makes contractor payments “stage-based”?

☺ Yes, Indecimal’s contractor payments are **stage-based**, meaning funds are disbursed to the construction partner **only after verified completion of each stage** by a project manager. This system is part of their **escrow-based payment model** to ensure transparency, reduce financial risk for customers, and reinforce quality control.
